

Rusummit

September 21st

Event: RUSummit is the exclusive business-event on Russian digital economy in Berlin. It connects digital and traditional companies, decision-makers in Russian business and visionaries of Eurasia and the New Silk Road.

Targets: The center of attention is to establish a lasting network of German and Russian business contacts for the joint Eurasian market of the future.

Speakers GRID: Stefan Kägebein, Committee on Eastern European Economic Relations; Benjamin Wilkening, Vice-President International Investor Relations Skolkovo Foundation; Alisa Prokhorova, Adviser to the President of Russian Union of Industrialists and Entrepreneurs RSPP, Representant of RSPP in Germany.

Discussed topic: Presentation of German Russian Initiative of digitization of economy, Digital Economy in Russia.

60 minutes, 150 guests

Metallurgy Upgrade: Digital Modernization from the Pit to the End Product

Open Innovation Forum, October 16th at 17.45

Speakers of GRID:

Ivan Kireev Skolkovo Foundation, Strategic partner development director;
Alexander Pisarets, Director of the Cluster "Industry", SAP Expertise Center;
Mikhail Aronson ZYFRA, Deputy CEO

90 minutes, 70 guests

Discussed topic: The mining and metals industry has always been seen as the lot of developing countries with tough and harmful labor conditions. The digital age is changing the existing practices today. By 2020, 40% of the companies in this sector around the world will invest in artificial intelligence solutions and the market capitalisation of machines in use will reach \$ 10 billion. Robot-controlled vehicles, artificial intelligence and augmented reality are not just new popular toys that miners and metallurgists are playing with, but rather a necessary measure that increases profitability and may completely eliminate the need for human presence in hazardous working areas.

- What is preventing the mining and metallurgic giants from implementing innovations?
- What digital technologies need to be integrated at the whole production chain (Mine to Mill) of the enterprises at the moment?
- HR deficit in the industry: where and when will robots, drones and artificial intelligence replace people?
- Go green: how does one increase the environmental efficiency of production enterprises?

WHAT'S NEXT
